

Måge

*

Den lille måge vugger nysgerrigt afsted på vandet. Det sværeste i foldningen er to udvendige knæk til hals og hoved, se teknik-afsnittet.

1 Marker diagonalen.

2 Fold i den anden diagonal.

3 Fold tilbage 1/4 inde.

4 Fold spidserne sammen.

5 Fold vingen til til rygkanten (mågen har stadig hovedet ned).

6 Gentag med den anden vinge.

7 Sådan. Drej 90 grader.

9 *Yderknæk* hovedet.

8 *Yderknæk* halsen.

10 Den færdige måge.

Teknik: Yderknæk

a Vi skal lave omvendt fold i markeringen.

d Åben hele folden lidt op (her set nedefra).

b Buk op og pres hårdt.

e Fold op omkring det markerede ombuk fra før. I den ene side vender folden forkert, den vender man.

c Fold ud igen.

f Luk hele folden sammen igen og pres fladt..
